THE ONLY NON-EMBEDDED HEATING SOLUTION FOR NAIL AND GLUE DOWN WOOD FLOORING

The new NWFA Guidelines allow for electric radiant heat under wood floors

- Controls floor temperature with in-floor sensor and thermostat
- Monitors and logs temperature and humidity readings with Fidbox
- Integrates seamlessly — constructed using ultra-thin and flexible materials
- Prevents overheating with tailored power output
- Protects with continuous thermal cutoff heating technology
- Simplifies installation — allows straightforward glue and nail application
- Supported by comprehensive warranty program
